

=====  
SNOWMASS GLD Concept Study Agenda  
=====

8/3/05

Times are rough estimates - can be adjusted flexibly.  
Schedule of each subdetector session is to be made by  
corresponding subgroup leader. It would include  
short presentations of works done at or before Snowmass,  
talks by people outside GLD, and discussions etc.

ECAL/HCAL includes forward calorimeters.  
Discussion on costing is to be included in the summaries.  
Software tutorials : Tues lunch.

Names are assigned based on the nominal leadership of each  
subgroup; but in general, the summary speaker  
may be better to be different from that of the review speaker.  
Such adjustment should be done within each subgroup.
